

Task: QA Automation Assessment

At Planet, we leverage Sahi Pro as our primary test automation tool to streamline and enhance the quality assurance process.

Sahi Pro is a lightweight and tester-friendly automation tool used for web, desktop, mobile, and API testing. It supports both scriptless and low-code approaches, allowing testers to automate without deep programming expertise.

This assessment is designed to evaluate your ability to create robust and maintainable automated test cases using Sahi Pro using the low-code solution, with a focus on real-world scenarios relevant to our applications.

Instructions:

- Create an automated test case to test the scenario below.
- Your code language should be JavaScript.
- You may use the Sahi Pro tool
- Once the script is complete, send the completed code/script files to janaina.dias@weareplanet.com
- Aim to return the completed assessment with 7 days of receipt.

Steps to request a Trial License in Sahi Pro

- 1- Visit the [Sahi Pro Free Trial page](#)
- 2- Fill out the form with your name, email, and organization details.
- 3- You'll receive a 14-day trial product key via email (no credit card required).
- 4- Go to the [Sahi Pro Downloads Archive](#).
- 5- Choose the latest version (e.g., V11.2.0) and download the installer for your OS.
- 6- Save the installer in a folder without spaces in the path (important for setup).
- 7- Double-click the downloaded installer.
- 8- Follow the installation wizard
 - Accept the license agreement.
 - Choose an installation path (avoid spaces).
 - Click OK when prompted to create the target directory.
 - Proceed with default selections.
 - Click Done when installation completes
- 9- When prompted, enter the trial product key you received via email.
- 10- Then restart Sahi Pro.

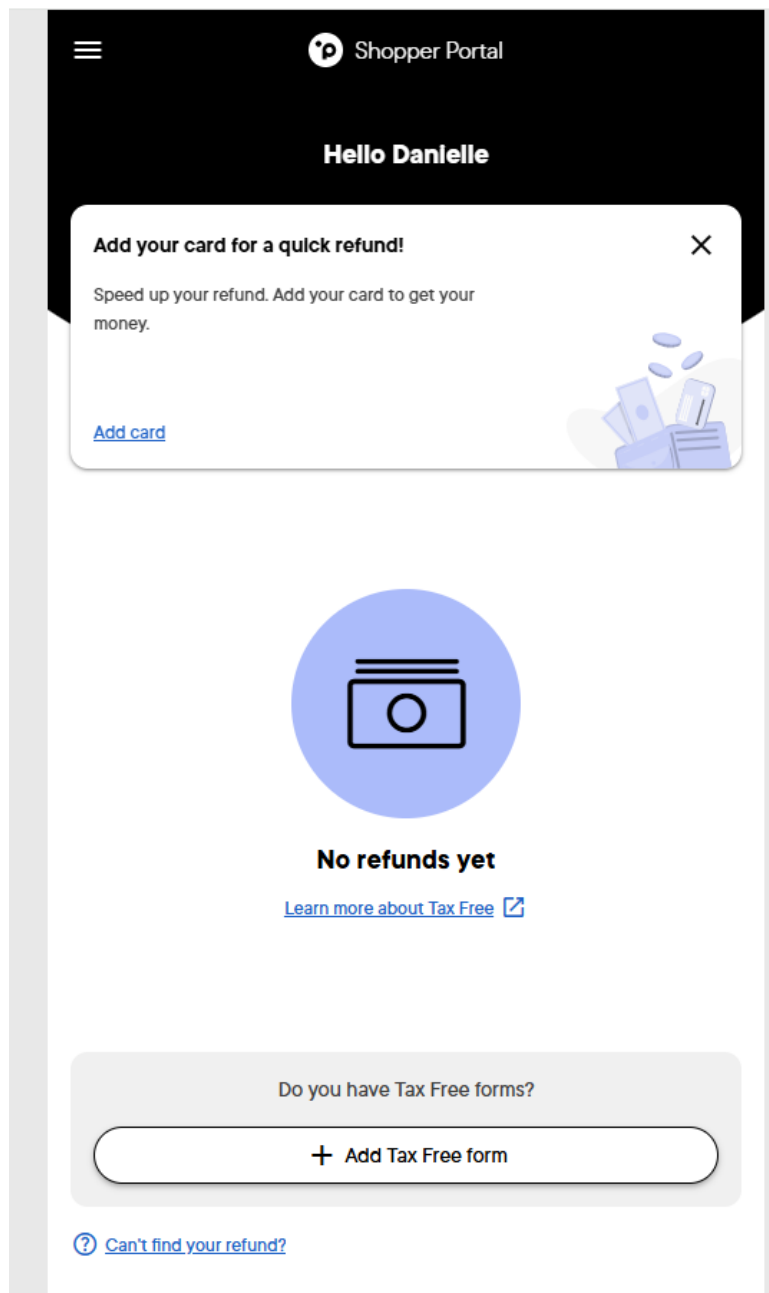

Test Case Scenario:

As a Planet customer, I want to create my profile in the Shopper Portal application.

Steps to create a profile:

- 1- Navigate to <https://globaltest-taxfree.planetpayment.com/ShopperPortalEU/>
- 2- Enter a new valid email (you need to have access to it).
- 3- Click on Continue.
- 4- Enter the code sent in the email
- 5- A page with Terms of Service will be displayed, mark as accepted and click on Continue.
- 6- A page Go ready your passport will be displayed, click on scan passport.
- 7- A page to scan will be displayed with a link to Enter passport manually. Click on the link.
- 8- Enter Passport Number, passport expiry date and passport country (select a country outside of EU, like the USA, Brazil, India), click on Confirm.
- 9- A Confirm passport details page is displayed with the details entered in step 8 and a link to Scan passport again. Click on Confirm and continue.
- 10- A page to Complete details is displayed with the fields:
Given names*, Surname*, Date of birth*, Nationality, Country or region*, Address line 1, Address line 2, Postcode, City and State or Province. The email entered in step 2 is displayed and a Mobile Number field. Fill in the mandatory fields only and click on Save.
- 11- A message profile data is saved is displayed.

12-The main page is displayed

Validation:

Validate elements shown on each step page.

Ensure that all required fields are filled in correctly.

Validate that the profile creation process is working.

Confirm that the user can log in with the new profile.

Documentation:

Provide a brief write-up explaining the test case, the steps involved, and any assumptions made.

Include screenshots or logs from Sahi Pro to demonstrate the test execution and results.

Additional Information:

If any of the requirements feel unfinished or you need any clarification, feel free to contact us with your questions on janaina.dias@weareplanet.com.

Tips:

- Optimize your code wherever possible e.g. page elements, functions, etc.
- Use good coding principles, readability and best practices
- Use comments to explain your code
